

What is claimed is:

1) A lamp cover or shade comprising:

A) a hollow pliant shell having an exterior surface in the form of a decorative shape; and

5 B) an interior cylinder integrally formed with said hollow pliant shell of a size and shape as to elastically engage the exterior of a light fixture, light fixture lens, bulb cover or bulb to which the lamp cover is applied.

10 2) The lamp cover or shade of claim 1 fabricated from a high temperature resistant polymeric material.

3) The lamp cover or shade of claim 2 wherein said polymeric material is stable at temperatures in excess of 200° C.

15 4) The lamp cover or shade of claim 3 wherein said high temperature resistant polymeric material is selected from the group consisting of silicone polymers and silicone rubbers.

20 5) The lamp cover or shade of claim 1 wherein said hollow pliant shell is colored.

6) **The lamp cover or shade of claim 1 wherein said hollow pliant shell is translucent.**

5 7) **The lamp cover or shade of claim 1 wherein portions of said hollow pliant shell are rendered opaque.**

8) **A decorative lamp comprising:**

A) **a lighting fixture having an exterior surface and including a socket, and a light bulb;**

10 B) **a hollow pliant shell having an exterior surface in the form of a decorative shape; and**

C) **an interior cylinder integrally formed with said hollow pliant shell of a size and shape as to elastically engage the exterior surface of the light fixture, socket or bulb to which the decorative lamp cover is applied.**

15

9) **The decorative lamp of claim 8 fabricated from a high temperature resistant polymeric material.**

20 10) **The decorative lamp of claim 9 wherein said polymeric material is stable at temperatures in excess of 200° C.**

11) The decorative lamp of claim 10 wherein said high temperature resistant polymeric material is selected from the group consisting of silicone polymers and silicone rubbers.

5 12) The decorative lamp of claim 8 wherein said hollow pliant shell is colored.

13) The decorative lamp of claim 8 wherein said hollow pliant shell is translucent.

10

14) The decorative lamp of claim 8 wherein portions of said hollow pliant shell are opaque.

15 15) The decorative lamp of claim 8 further including a lens or globe over the light bulb that is engaged by the integral interior cylinder.
